A: SQL Azure is now SQL Cloud which is a subset of SQL 2012 A: Databases are a set of tables, you can specify where those tables are located on a server, but the name of the database is given by the client application (web browser, desktop client, mobile apps, etc.)

What's New in the Dbdesc?

Supports SQL Server 2005 databases. Generates documentation in HTML. Simple to use. Integrated into your build process. Details about the databases you selected are stored within the application for future reference. Designed as an extension of the scripts required for the SQL Server porting wizard, dbdesc is a useful tool when trying to document your databases. Here's a video of the app in action. Enjoy!
