Television and video cassette recorder (VCR) recording commonly involves reproduction of blank media segments that are physically independent of the television program segments being recorded, while still another type of recording involves simultaneous playback and recording of television broadcast programs. In either case, a user may wish to view the blank segments of the media and record the televised program being played back concurrently. It is therefore desirable to have a single integrated device that can accommodate both viewing of the blank media segments and recording of the television program being played back. In this regard, U.S. patent application Ser. No. 07/847,463, filed Mar. 14, 1992, invented by the present inventors, and assigned to the present assignee hereof, provides a dual mode recording device that can be operated in either a recording or viewing mode. The television broadcast program is played back in a television viewing mode, while the blank media segments are recorded in a recording mode. With reference to FIGS. 1 and 2, the prior art dual mode recording device (10) comprises a housing 12 housing the necessary circuitry for operation in the television viewing mode as well as the recording mode. A recording mode trigger button (14) is provided, preferably on the housing 12 to enable the dual mode recording device (10) to be switched from the television viewing mode to the recording mode. Trigger button (14) is also provided to enable the

If this is not possible maybe I can create this list of string and make it a dictionary. Thanks for your help and attention. string listOfString = new List(); // Here is how I add the strings to listOfString. string string1 = "1"; string string2 = "2"; string string3 = "3"; string string4 = "4";
