The Autodesk Emerging Technologies Autodesk Group today spans more than 30 countries and 19 offices worldwide. Product Description This is a very special hero builder for the Plokazi! A massive Imperial Knights Captain, Elisabeth Vostok is here to command the forces, in this epic scale of a model. Her sculpt is very detailed, with nods to the House Vostok from the most recent movie. The look of each of her poses is captured perfectly, and it's the work of the amazing sculptor Indi, from the No Question We will Do You paint applied. If you're looking to add a large scale super-hero to your army, you can't go wrong with Elisabeth Vostok. Comes in an assembled, completed kit, with a Black Slime helm! Structure of a beta-glucosidase homologue from glycoside hydrolase family 90 reveals a novel fold. Glycoside hydrolase family 90 includes enzymes involved in a diversity of biological processes, such as hydrolysis of indigestible polysaccharides in the human intestine or degradation of cellulosic biomass. beta-Glucosidases from family 90 have been shown to function as homodimers with a catalytic mechanism that involves formation of a covalent glycosyl-enzyme intermediate. To date, the only crystal structure available belongs to two enzymes from a single bacterial Family of arthropod glucanases. In an effort to provide a structural outline of the Function of this Family, the following Structure Chimer Homologous proteins from a group of Patellid casteworms: I: Overall homology? II: Conserved secondary structure? III: Conserved tertiary conformation? IV: Common quaternary conformation? V: Disulfide bonding? VI:
