hypercalcemia in rats  
with  
interleukin-3-induced  
immune complex  
glomerulonephritis by  
the administration of  
hydralazine. We  
examined the efficacy  
of the calcium  
channel blocker  
hydralazine in  
treating immune  
complex-induced  
glomerulonephritis in

---

the rat. Rats were immunized with a sheep red blood cell-anti-sheep red blood cell antibody complex and studied 10 days after the second injection of antibodies. The administration of hydralazine to rats with immune complex-induced glomerulonephritis

---

reduced both serum calcium concentration and proteinuria, with a concomitant decrease in nephritic index. At the same time, hydralazine increased renal blood flow and filtration fraction, without changing the glomerular filtration rate. The elevated serum calcium and

---

elevated creatinine levels in the rats with immune complex-induced glomerulonephritis were normalized by hydralazine treatment. The results of this study suggest that hydralazine therapy may be useful in the treatment of calcium overload in

---

glomerulonephritis  
and that the  
abnormality in renal  
hemodynamics in this  
model may be caused  
by calcium  
accumulation. This  
section provides  
background  
information related to  
the present  
disclosure which is  
not necessarily prior  
art. Portable

---

computing device users are constantly on the lookout for ways to maximize the convenience and usefulness of their portable computing devices. For example, many users have struggled to put a rechargeable battery pack in a position to be easily accessible when the portable

---

computing device is fully charged, and yet maintain the ability to conveniently remove the battery pack when it is time for the portable computing device to be recharged. A problem commonly encountered when attempting to place a battery pack in a device that allows for

---

the removal of the battery pack, but does not allow for the removal of the battery pack without the use of an external tool, is that the battery pack must be removed from the device and the device disconnected from the power source in order to access the battery. For example,

many portable  
computing devices,  
such as lap top  
computers

Make any logo look good and different! General Logo Builder is a small software application designed specifically for helping you create your own logos using custom text placed on a fixed number of logo images. It is based on scripts so it

---

can be customized according to your preferences. Keep it on portable devices  
This is a portable program which makes it an ideal candidate for being saved on USB flash drives. You can gain access to the tool's features by simply running the executable file

---

(there's no installation included in the process). A quick deletion task is sufficient for getting rid of the utility because it does not store entries in your Windows registry. Simplistic looks You are welcomed by a clean and minimalist working environment that comes packed

---

with only a few configuration settings. Decoding the dedicated parameters won't take much of your time because they look highly intuitive. A help manual can also be displayed directly in the main window and includes short descriptions about the app's

---

functions. Design logos General Logo Builder comes packed with only three predefined logo images that can be used in your projects. On each logo photo you are given the freedom to place custom text. The text content can be typed in directly in the main window or pasted

---

from the clipboard. What's more, you are allowed to copy the personalized logos to the clipboard so you can quickly paste them into other third-party applications, export the image to BMP file format to a custom location on your PC, and set the current logo as your desktop wallpaper.

---

Tests have shown that General Logo Builder carries out a task quickly and provides good output results. It is not a resource hog so you don't have to worry that it hampers the overall performance of the computer.

General Logo Builder Features: • Generate logo images from a

---

standard template, or from a custom image.

- Place logos on any number of images of a standard template or from a custom image.
- Place custom text on an unlimited number of images.
- Use any font that supports Unicode.
- Paste a logo directly from the clipboard.
- Cut and

---

paste your logo images to the clipboard. • Multiple logos can be placed on the same image. • Copy multiple logos to the clipboard. • Image editing tools: crop, resize, rotate, scale, flip, change color, and adjust brightness and contrast. • Apply filters: blur, sharpen,

---

enhance contrast,  
and more. • Output:  
icons, printer friendly,  
e-mails, and PNG  
format
