For information about the Microsoft Windows and Macintosh versions of FlippingBook Publisher: The Windows version is available from <http://www.microsoft.com/windows> The Macintosh version is available from <http://www.apple.com/mac/download/> FlippingBook Publisher will continue to run in the background. You can start a flipbook on one workstation, add more workstations as needed, add more flipbooks, and publish your flipbooks at the same time. I want to say that everybody can try FlippingBook. We start with the most popular use cases and this is where we usually start. But we also have lots of readers with unique needs and we are not sure if we can meet your particular needs. For this reason, we offer a discount for people who subscribe to the premium version. If you don't find what you need in the free version, you can purchase the higher version with this discount. You can always purchase an upgrade later if needed. FlippingBook Publisher is a Web-based flipbook (or online publication) engine. It is written in Ruby and Perl and uses ZAPES to run on Linux and Mac. It fully integrates with Joomla and Easy Digital Downloads. It uses Apache as its main backend. This combination of technologies gives you the flexibility to implement any changes you may need quickly and easily. If you're using Joomla as your publishing solution, FlippingBook Publisher uses its powerful plug-in and Joomla components for publishing and Joomla to make the publication experience just as good as if you were using Joomla itself. 5ec8ef588b
